

Environment Policy

Sunstate Cement Ltd is firmly committed to managing its business in a sustainable manner so that its impact on the environment is minimal. It is the obligation of every Sunstate employee, contractor or visitor to ensure that they do not walk past an environmental issue without rectifying or reporting it.

We are fully committed to compliance with the Environmental Protection Act and seek to eliminate or minimise dust emission, waste discharge and noise generation from our operations.

Our culture is underpinned by a low tolerance to risk, where every task will be specifically assessed and procedures developed to mitigate the risks. Sunstate is committed to investing in the training and development of its workforce and to driving through a culture of continuous improvement and best practice adoption in order to achieve its environmental objectives. We will seek to identify, learn from and eliminate the root causes of incidents as they happen, and communicate these widely within the organisation.
